NOTICE OF ALLOWABILITY

1. The following is an examiner's statement of reasons for allowance:

Negami et al (US 6,259,016) teaches a $Zn_{1-x}A_xO$ layer with A being at least one of Be, Mg, Ca, Sr, and Ba, and with $0 < x < 1$ as cited in the previous rejections. There is no example including plural elements A, and no teaching or guidance as to the amount in which a second element A might be present. In the Examiner's opinion, there is therefore no teaching or fair suggestion of a film composition wherein both (a) the claimed content of element M is in a range of 0.01 to 3 atom percent and (b) the Zn:Mg:O atomic ratio is $(1-x):x:1$ with $0.05 \leq x \leq 0.35$ as instantly claimed. This is considered particularly so since Applicant teaches the significance of the claimed range of element M content in improving volume resistivity of the film (Specification, Page 4, line 37 - Page 5, line 8), with the Negami et al reference being silent on such effects.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Jeffrey T. Barton whose telephone number is (571)272-1307. The examiner can normally be reached on M-F 9:00AM - 5:30PM.
